RE: Exemption from Sludge Quality Assurance Regulations (SQAR) Reporting
HPI Processes, Inc.

Dear Mr. Cooper:

I have reviewed the information contained in your June 21, 2008 letter requesting exemption from reporting under the Sludge Quality Assurance Regulations (SQAR, N.J.A.C. 7:14C) for sludge generated by your truck washing operation. Due to the relatively small amount of sludge generated (approximately 1.4 wet tons per year) an exemption from reporting is hereby granted. However, records on the amount of sludge generated and how it was ultimately managed shall be maintained and kept on file for a minimum of five years.

If the nature of the process wastewater or sludge produced by the industrial treatment works on a modified reporting schedule should change at any time due to an increase or change in process wastewater contributions, a change in treatment processes at the industrial treatment works or a change in its process, handling, manufacturing, packaging, storage or disposal practices, the owner or operator shall, within thirty (30) days notify the NJDEP of the nature of the change. Based upon this information, the NJDEP may require analyses to be performed and require that the industrial treatment works return to the reporting schedule required by N.J.A.C. 7:14C.

Please contact me or Patrick Brown of my staff at the above address or by phone at (609) 633-3823 if you have any questions.

Sincerely,

Anthony Pilawski, Supervisor
Bureau of Pretreatment and Residuals
Division of Water Quality
